Re: Red and Bonita Adit entry work and retention pond

To: Todd Hennis
Cc: sisk.richard@epa.gov
Bcc: Steven Way

Thank you for discussing with me yesterday the plans we have for work at the Red and Bonita. I am following up on the our conversation about managing the adit discharge from the Red and Bonita during the adit entry activities we hope to perform in October. As discussed, the plan is to create a temporary retention basin immediately below and along the county road within the Success Placer claim that will allow for the suspended solids to settle and be contained before filtering the flow and discharging it to the drainage into Cement Creek.. Initial estimates of the size will be at least 100 x 20 feet and 3 to 4 feet deep. The current plan is to perform this work in late September and early October 2012.

Your cooperation is greatly appreciated, and if you have questions please contact me.

CONSENT FOR ACCESS TO PROPERTY

Name: Citizen Name/Ex. 6 individually, and as owner and representative of San Juan Corp. and Salem Minerals.

Location of Properties: Citizen Name/Ex. 6 San Juan Corp./Salem Minerals' lands on or near the Gladstone area, including the Harrison Mill Site, Anglo Saxon Lode, the claims near and including the Upper Gold King 7 Level mine and the Success Placer, Sampson MS, and claims near and including the Mogul and Grand Mogul mines and other claims identified in the attached list (the Properties).

I consent to continued access through December 2015 for officers, employees, and authorized representatives of the United States Environmental Protection Agency (EPA), Bureau of Land Management/US Department of Agriculture (BLM/USDA-FS, and State of Colorado, and their designees (contractors), for the purposes below:

1. Conducting field inspections and investigations, and staging equipment, constructing of temporary mine water management units (c.g. settling ponds) to evaluate the mine waste, adit discharges and related seepage, and the associated impacted lands.
2. The drilling of holes and installing monitoring wells and other actions related to the investigation of surface or subsurface contamination in/on the waste dumps and adjacent lands.
3. Sampling and monitoring water, soil, and mine waste material from waste rock dumps, tailings impoundments, and mine workings or other areas as necessary to evaluate releases of hazardous substances.
4. Constructing a new adit portal and opening the collapsed portion of the Upper Gold King Mine (7-Level) tunnel. (In support of this work, San Juan Corporation is offering to provide Steel arch sets, I-beams, HDPE pipe and cement mix needed for the portal and ground support.)

I realize that these actions are undertaken pursuant to EPA's response and enforcement responsibilities under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund), as amended, 42 U.S.C. §§ 9601 et seq.
